REMARKS

During the week ending the 2nd August, 1947 in India (excluding East Punjab, Bihar, West Bengal and Assam) and in the Indian States shown in this statement, the total number of deaths recorded in 131 towns having a population of 30,000 and over was 7,917. The mid-year estimated population of these towns was 15,881,738 and the death rate was 25.9 per thousand of the population. Births in the same towns numbered 12,135 giving a birth rate of 39.7 per thousand of the population. In India alone the corresponding birth and death rates were 40.2 and 26.4 per thousand of the population respectively.

(A) *India*—The following towns in India returned a death rate of 50 or over per thousand of the population.

Benares (62.9), Pandharpur (61.0), Hardwar Union (53.6), Etawah (52.9), and Baisi (51.4).

The high death rates in these towns were largely due to deaths from fevers and to some extent due to deaths from respiratory diseases. There was a considerable number of deaths from dysentery and diarrhoea in Benares.

NEW DELHI 3 (INDIA),

The 1st August, 1947

In 118 towns in India there were 68 deaths from cholera, 38 deaths from small pox and 2 deaths from plague. Of the deaths from cholera Jubulpore recorded 17, Mirzapur, Bindhachal 13, Benares 8, Farle Andheri 6, Dehia Dun, Allahabad and Jaunpur 4 each, Cawnpore 3, Broach, Lucknow, Hardwar Union, Bombay, Nasik, Poona and Guntur one each. Of the deaths from smallpox Nagpur recorded 21, Meerut 3, Allahabad, Nagpur Civil Station and Aurangabad 2 each, Sitapur, Lucknow, Benares, Sambhalpur, Raipur, Bombay, Ahmedabad and Belgaum one each. The deaths from plague Belgaum and Coimbatore each recorded one.

(B) *Indian States*—Amongst the Indian States shown in this statement, there was no town which had a high death rate of 50 or over per thousand of the population.

In 13 towns of the Indian States only Porbandar recorded 3 deaths from cholera and 2 deaths from smallpox. Plague was absent during the week.

JIVRAJ N. MEHTA,

Director General of Health Services.
